General Information

Prices

All prices listed in the price list are recommended retail prices excluding VAT and are valid until revised.

Delivery times

Indicated delivery times are always ex works Dübendorf (Switzerland). Standard delivery time is about 5 weeks.

Delivery surcharges

according to the terms of sale.

Colors & metal finishes

The available standard colours can be found on the product price sheet.

Special colors

From the RAL or NCS colour chart Surcharge of + 300.- per colour and order.

Dimensions

The dimensions given are basic dimension. Custom-made Available on request.

Outdoor

Products with this symbol are weatherproof and suitable for outdoor use.

Cancellations and claims

Cancellations or changes to orders are possible within 5 days of order confirmation. Complaints will only be accepted within 5 working days of receipt of the products. Subject to model, color and price changes. Delivered goods remain the property of Lehni AG until full payment has been received.

Aluminium blank (untreated)

Machining marks may be visible in the raw aluminium finish. They are not a reason for complaint.

Linoleum

Linoleum is a natural product which may show slight irregularities in the surface. They are no reason for complaint.

Wood

Every wood has individual structures and colours and its colour changes over time under the influence of light. This is not a reason for complaint.

Bananatex

Exposure to sunlight can generally cause colours to fade or yellow. Due to the deliberate avoidance of environmentally harmful finishing of the fabrics, the darker fabrics tend to fade more when exposed to strong sunlight.

- Table Flex monochrome powder-coated finish (legs powder coated)

Surcharges for special colors for table tops according to the Lehni table price list

In general, no discount is granted on the surcharge for special designs.

Care instructions

Metal: Care and cleaning of metallic and painted surfaces are problematic. Like window glass, they can be cleaned with water and a neutral cleaning agent. Wipe away dust with a dry microfiber cloth without pressure and dry with a clean cloth.

Important: Do not use alkaline, acidic or abrasive cleaning agents. Do not use abrasive or scratch-causing agents such as steel wool and sponges with scratchy surfaces must not be used.

Wood: The surface of veneered furniture is protected by varnish. It is sufficient to remove dust regularly with a soft, dry cloth or a slightly damp, supple leather in the direction of the wood fibers. in the direction of the wood grain. You can also add a little washing-up liquid to the water.

Forbidden: bleaching and acidic additives as well as all other all other cleaning, polishing or even scouring agents. Lacquered veneer surfaces must not be cleaned with microfiber cloths. Acidic liquids, e.g. fruit juices or alcohol, should be or alcohol, should be dabbed off immediately and the surface wiped with a damp cloth/leather.

Linoleum: Loose dirt can be removed with dust-binding cloths or vacuuming. To remove adhering neutral detergent (neutral pH value) in water according to the dissolve in water according to the manufacturer's instructions. Soak a soft soak a soft cloth with cleaning solution and wring out well. Wipe the linoleum surface clean.

Special notes: Particularly in the post-oxidation phase, linoleum a "yellow tint", the drying chamber film, develops on linoleum. This is particularly noticeable on light colors, but disappears completely when exposed to completely when exposed to UV light and the linoleum retains its original color. On the other hand, this "yellow tinge" reappears when the flooring surface is exposed to surface is covered with monitors, mouse pads, etc. for a longer period of time, but disappears disappears as described above as soon as the surface is

exposed to daylight again. exposed to daylight again. The drying chamber film cannot be removed technically impossible to remove.

-Flower pots and tubs made of terracotta or clay can leave discolorations on linoleum, please use suitable coasters.

-Hand and appliance disinfectants can cause stains due to their high solvent content. disinfectants can cause staining due to their high solvent content, please use suitable. If the linoleum surface needs to be disinfected, only use surface disinfectants suitable for linoleum disinfectants and test them before hand on a sample piece or on an a non-visible area.

-Coloring foods (e.g. ketchup, red wine, coffee, etc.) can leave stains behind if left for a long time stains that may not be able to be removed if left on for a long time. Please clean the surface immediately after cleaning.

-The desktop material can only withstand heat up to 50°. Rule of thumb: Can the object to be can still touch the object to be set down with regard to the heat emitted, then it can also be placed on the desktop material. Scratches can be removed to a certain extent with a shelled and skinned walnut by rubbing the white nut meat over the area and then wiping with a soft cotton cloth.

Upholstery fabrics: Like all materials in daily use, upholstery fabrics also require regular care, as they are also subject to constant dust and contact soiling. In general, soiling should not be allowed to become too intense so as not to make cleaning more difficult and to prolong durability.

The following applies in principle

-Vacuum regularly with a suitable upholstery nozzle or brush.

-Clean with a damp cloth every six months to maintain the elasticity of the fibers. velour fabrics once from left to right and once in the opposite direction allow to dry completely before use.

Aluminium Shelf for Project (Library rooms, archive rooms, generally high load requirements)

For specific archival or library projects, Lehni offers the aluminum shelf by making some technical modifications to ensure maximum stability and function. Specifically, aluminum sheet metal with a thickness of 2 mm (standard 1.5 mm) is used; this allows for a load of up to 40 kg per shelf. Adjustable feet allow, if the floor is not level, to adjust the height and achieve the required stability. The intermediate shelves are hung and not screwed, this allows the shelves to be adjusted freely in a 2.5 cm raster. The offer will be specific according to the submitted design.
