Sense of shelf

Perfection in furniture design

When it comes to shelving, you can trust the Swiss. Lehni was founded in 1928 in Dübendorf, and today Ursula Menet runs the firm with her brother Heinz Lehni. She says the Swiss tradition of first-class precision influences everything they do. Designs from the likes of Frédéric Dedelley and Donald Judd are pressed carefully and stamped into shape from anodised or crude aluminium plates – a technique that revolutionised furniture design over 40 years ago and one that Lehni has since perfected. — LL
